

# Ninth Annual ISK Institute Sports Medicine and Total Knee & Hip Symposium

Last Updated Tuesday, 08 August 2006

Join the foremost experts in orthopaedics for the Ninth Annual Insall Scott Kelly Institute Sports Medicine and Total Knee & Hip Symposium to be held September 15-17, 2006 at the Hilton New York.

This meeting will change the way you treat your patients through point-counterpoint debates, case presentations and panel discussions.

Examine your current treatment options as faculty take you step-by-step through real-life case presentations. Electronic audience response surveys will instantly report how faculty presentations changed treatment methods for you and your colleagues. In addition to audience participation, faculty will partake in point-counterpoint debates to determine the most effective options to treat your patients with knee, hip, and ligamentous injuries.

This CME program will provide you with the most recent developments in surgical and therapeutic treatments to improve patient outcomes in your practice, including:

- Surgical treatment of patellar instability
- ACL reconstruction
- Arthroscopic management of chondral injuries
- Management of infected total knee arthroplasty
- Navigation of total joint arthroplasty
- MIS techniques in total hip arthroplasty
- Use of bone grafts in revision total hip arthroplasty
- Evaluation and management of infected total hip arthroplasty
- Anesthesia algorithm for outpatient total joint arthroplasty

Seating is limited for this course, so register today to reserve your space.
