

Lower limb pain

Last Updated Wednesday, 28 March 2007

Best Practice & Research: Clinical Rheumatology

Karsten E. Dreinhöfer MD, et al. - This article summarises lower limb pathology, which results in lower limb pain. It mainly addresses injuries and deliberately omits osteoarthritis and rheumatoid arthritis, since these entities are described in detail in other chapters in this volume. As major trauma is not a focal point for rheumatologists and repetitive strain injuries of the lower limb are rare, sports and leisure injuries are the main focus
