

## Minimally Invasive Rotating Platform Total Knee Replacement

Last Updated Sunday, 09 July 2006

Total Knee Replacement: On Thursday, May 20, 2004 at 4:30 pm EDT, Brigham and Women's Hospital (BWH) will host a live Webcast in which participants can view an emerging procedure designed to help improve the quality of life of many who suffer from severe knee arthritis and other knee damage that impairs mobility. During this Webcast, BWH doctors will perform a minimally invasive rotating platform total knee replacement (TKR), a less invasive operative approach to traditional TKR surgery.
