

## Reliability and Validity of the Subjective Component of the American Orthopaedic Foot and Ankle...

Last Updated Wednesday, 28 March 2007

The Journal of Foot and Ankle Surgery

Talal Ibrahim MD, MRCS, et al. - The moderate level of correlation, satisfactory degree of reliability, and responsiveness (ability to distinguish differences between preoperative and postoperative conditions in the same patient) observed in this study suggest that the subjective component of the AOFAS clinical rating scales provides quality-of-life information that conveys acceptable validity regarding conditions affecting the foot and ankle
