

Early detection of podiatric anomalies in children with Down syndrome

Last Updated Wednesday, 28 March 2007

Acta Paediatrica

Concolino, Daniela, et al. To verify the importance of podiatric evaluation in patients with Down syndrome for the early diagnosis and treatment of minor orthopaedic problems...Conclusion: The data demonstrated a greater incidence of minor orthopaedic alterations and suggest the necessity of regular podiatric examinations in the follow-up of this syndrome
