

Two Incision Total Hip Replacement Surgery

Last Updated Sunday, 09 July 2006

Orthopedics: Surgeons at Morristown Memorial Hospital will perform a not-so-widely used minimally invasive hip replacement technique live over the Internet. The broadcast will take place Friday, June 18 at 2 p.m. EDT / 1800 UTC. The procedure, a 2-incision total hip replacement surgery, allows the surgeon to remove a damaged hip and replace it with plastic or metal implants through two small incisions rather than the traditional 12-inch opening.
