

Reconstruction of Syndactyly and Polysyndactyly of the Toes With a Dorsal Pentagonal Island Flap: A.

Last Updated Wednesday, 28 March 2007

The Journal of Foot and Ankle Surgery

Yi-Jia Lim MBBS, MRCSEd, MMed(Orth), et al. - Syndactyly and polysyndactyly are common congenital conditions involving the foot, and surgery to reconstruct the toes may be indicated for cosmetic, psychological, and practical reasons. A dorsal flap is traditionally used for web space reconstruction, with skin grafts for the bases of the toes
