

The Fifth Annual Teton Hand and Upper Extremity Conference

Last Updated Tuesday, 09 October 2007

This is a course for the Orthopaedic Resident/Surgeon and Therapist. It is a Review of Upper Extremity Anatomy, Surgical Procedures, and Therapeutic Interventions. Anatomy is Power! Come participate in a peerless study of the upper extremity while vacationing in the world-renowned Jackson Hole.

We would like orthopaedic residents to be made aware of an upcoming continuing medical education opportunity.

The Fifth Annual Teton Hand & Upper Extremity Conference will be held January 9-12, 2008 in Jackson Hole, Wyoming.

There are two remaining speaker spots in the Resident Forum portion of the conference. Residents are to submit application to speak or to display an orthopaedic upper extremity poster presentation, as soon as possible.

In order to encourage more residents to attend we are offering a special registration fee down from the \$500 student fee to \$300 providing a second resident is recruited to attend also.

Please see <http://www.tetonhandconference.com> or call 307-733-4662.
