

McKesson Webinar Helps Manage Tissue and Device Implants Safely

Last Updated Sunday, 13 September 2009

Discover how McKesson's new Horizon Tissue Manager uses tissue tracking to help efficiently manage tissue and device implants to ensure patient safety

This webinar reviews the benefits of implementing Horizon Tissue Manager from McKesson to efficiently facilitate your tissue tracking needs. By facilitating compliance with Joint Commission and FDA regulations concerning tissue tracking and device implant management, Horizon Tissue Manager helps ensure patients know that any implants put in their body are safe. Attend this webinar to learn more about providing safe and timely tissue and device implants.
